

## NEW PARTNERSHIP

# BASIKON & JYN INFO CONSEIL JOIN FORCES TO BREAK INTEGRATION BARRIERS AND ACCELERATE FINANCIAL DIGITAL TRANSFORMATION!

*"Digitalization is no longer an option; it's a necessity. But achieving this transformation requires the right tools and the right partners."  
Ignacio Olivera, Country Manager at Basikon*

**Basikon**, the cloud-native, 100% API, core banking platform, and **JYN INFO CONSEIL**, a leading expert in financial solution integration, are announcing a key partnership set to revolutionize financing platform implementation.

The Basikon logo features the word "Basikon" in a blue sans-serif font, with the letter "o" replaced by a stylized blue and green icon resembling a power button or a stylized 'u'.

100% API  
LOW-CODE

### A PARTNERSHIP FOR INNOVATION AND PERFORMANCE

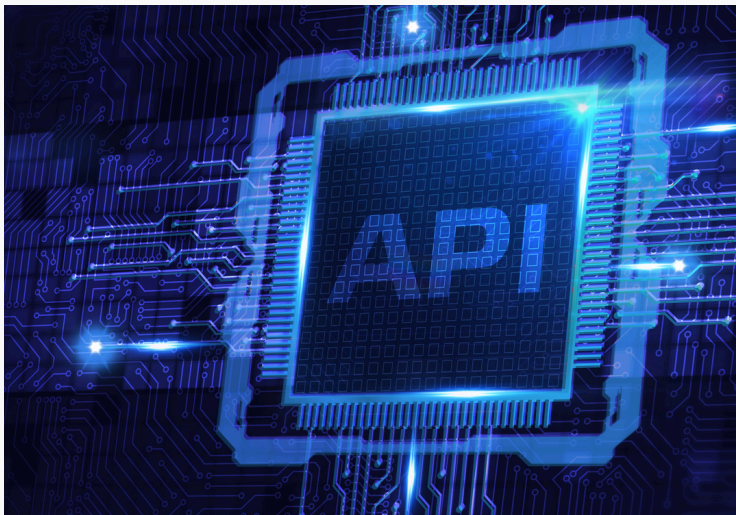

The financial sector is evolving rapidly—credit processes are accelerating, real-time data flow orchestration is becoming essential, and system interoperability is now a key challenge. However, integrating new solutions remains a critical hurdle for financial institutions, often constrained by monolithic architectures, data silos, and rigid infrastructures.

The financial sector is evolving rapidly—credit processes are accelerating, real-time data flow orchestration is becoming essential, and system interoperability is now a key challenge. However, integrating new solutions remains a critical hurdle for financial institutions, often constrained by monolithic architectures, data silos, and rigid infrastructures.

Basikon is a leading technology provider for leasing, auto finance, equipment finance, factoring and consumer lending. Its platform is designed for banks, captives, leasing companies, fintechs, and other financing players, allowing them to manage the entire credit lifecycle—from origination to collections—with advanced capabilities such as:

- Credit and leasing management (origination, contract servicing, collections)
- Automated credit scoring and decisioning
- Pricing and simulation engine
- Orchestration of financing workflows
- Native integration with third-party services (Open Banking, e-KYC, scoring, e-signature)

Leveraging its expertise for nearly 20 years in IT consulting, **complex project management, and integration of cloud, low-code, and DevOps solutions**, JYN INFO facilitates the seamless adoption and orchestration of Basikon within existing IT ecosystems, ensuring a smooth transition to a modular and composable infrastructure. They also own **2GEZER**, a dedicated subsidiary specializing in Salesforce projects, covering consulting, implementation, support, and digital design, further extending the digital transformation impact for its clients.

## SEAMLESS DIGITAL TRANSFORMATION

Innovation should not mean complexity. Basikon's headless and event-driven architecture enables advanced workflow automation and secure exposure of services via REST and GraphQL APIs. By leveraging Agile methodologies and robust IT governance, JYN INFO optimizes each stage of deployment—from data mapping to middleware and third-party API integration (Open Banking, scoring, e-KYC, digital onboarding, etc.).

With real-time business event management and cloud-native scalability, financial institutions can modernize their infrastructure without disrupting operations, while benefiting from enhanced observability through centralized logs and advanced monitoring tools.

## A SHARED VISION FOR THE FUTURE OF FINANCE

**This partnership is more than just a technological integration**—it is built on a Platform-as-a-Service (PaaS) approach, ensuring intelligent automation of credit life cycles and unmatched modularity. Basikon and JYN INFO share a common vision: to drive financing models towards cloud-native, composable, and data-driven infrastructures.

In a sector where IT resilience, regulatory compliance (Basel III, IFRS 9, GDPR), and operational performance are paramount, this collaboration unlocks new opportunities for financial institutions looking to streamline operations, reduce costs, and accelerate time-to-revenue. Financial institutions ready to embrace a new era of technology can now leverage this strategic alliance to gain a competitive edge.
